

LUKAS A.

Attacking Midfielder · Age 14 · Left foot · IK Falken U15

Overall Development Score: 8/10

Player Type: Smart playmaker · strong left foot

EXECUTIVE SUMMARY

Lukas is a smart, calm playmaker with a left foot that opens up defences. He reads the game very well for his age and is brave on the ball under pressure. He plays simple when needed and risky when it pays off. The biggest area to grow is his fitness — he fades in the second half. Build the legs and the rest is already at a high level.

SCORE OVERVIEW

Attribute	Score	Notes
Technical	8/10	Composite technical ability
Tactical	9/10	Composite tactical intelligence
Physical	7/10	Composite physical attributes
Mentality	9/10	Composite mental attributes
Overall Development	8/10	Overall development indicator

TECHNICAL ANALYSIS

Attribute	Score	Notes
First Touch	8/10	Clean first touch that sets him up to play forward almost every time. Rare to see him let the ball bounce away.
Ball Control	8/10	Keeps the ball close in tight space. Comfortable on both surfaces of his left foot.
Dribbling	7/10	Beats defenders with a feint and change of direction rather than pure pace. Effective in 1v1s.
Passing	9/10	His standout skill. Vision to find passes others miss, and the technique to deliver them.
Shooting	7/10	Strikes the ball cleanly with his left foot. Could be braver shooting from outside the box.
Weak Foot	5/10	Right foot is rarely used. Needs daily work — even short passes and simple drills will make a big difference.
One V One	7/10	Calm in 1v1 situations. Picks the right moment to go past or release the ball.

TACTICAL ANALYSIS

Attribute	Score	Notes
Positioning	9/10	Always finds the right pocket of space between defenders. Smart at finding angles for his teammates.
Off Ball Movement	8/10	Moves to receive constantly. Could improve runs in behind the defence to add another threat.
Scanning	9/10	Looks over both shoulders before the ball arrives almost every time. Top level habit for his age.
Decision Making	9/10	Picks the killer pass when it's there. Recycles smartly when it isn't. Mature beyond his years.
Timing Of Runs	8/10	Times runs into the box well. Could vary the timing more to be unpredictable.
Game Understanding	9/10	Reads the game very well. Anticipates where the next ball will go.

PHYSICAL ANALYSIS

Attribute	Score	Notes
Acceleration	7/10	Quick first few steps when he needs them. Not explosive but enough to create separation.
Speed	6/10	Average top speed. Not a player who beats defenders by running past them.
Balance	8/10	Stays on his feet through contact. Good lower body strength for his age.
Agility	8/10	Changes direction sharply. Light on his feet in tight areas.
Intensity	6/10	Drops off in the second half. Fitness is the area that limits him most right now.
Body Control	8/10	Uses his body well to shield the ball and protect possession under pressure.

MENTALITY ANALYSIS

Attribute	Score	Notes
Confidence	9/10	Wants the ball in every situation, even when his team is under pressure. Never hides.
Work Rate	7/10	Works hard but tires late. Fitness will lift this score quickly.
Courage In Duels	8/10	Steps into challenges rather than avoiding them. Brave for his size.
Response To Mistakes	9/10	Reacts to losing the ball by sprinting to win it back. Doesn't sulk after errors.
Competitive Mindset	9/10	Clearly hates losing. Lifts his teammates when the score is against them.
Focus	8/10	Stays in the game mentally throughout. Rare to see him switch off.

SCOUT VIEW · HOW A SCOUT MIGHT ASSESS THIS PLAYER

Key Strengths

- Always looks around before he gets the ball
- Left foot can pick out any pass
- Stays calm under pressure
- Wants the ball in every situation

Areas of Concern

- Tires late in matches
- Right foot needs work
- Slow to react when team loses the ball

Development Priorities

- Build match fitness so he can press for 90 minutes
- Daily right-foot work — even 10 minutes a day
- Add runs in behind the defence to his game
- Quicker reaction when transitioning to defence

Appropriate Next Competitive Level

Ready to step up to a stronger U15 team or an academy trial

Positional Suitability

Best as a creative #10 right behind the striker. Could also play as an 8 in a 4-3-3 if he gets fitter.

This is an independent development analysis and does not guarantee selection or advancement opportunities.

POTENTIAL ASSESSMENT

Current Level: Already one of the better players in his age group at club level

Development Potential: High ceiling. Technique and game intelligence are already at a level that's hard to teach. If fitness comes, the path is wide open.

Recommended Next Step: Play with older players at training to challenge his fitness and physical game

3-Month Focus: Fitness and right-foot development. Keep everything else ticking and grow these two areas.

PERSONAL TRAINING PLAN

Five Specific Exercises

Receive and turn · 15 min

Stand in tight space with a teammate or cone behind you. Maximum three touches — open your body, turn, pass, repeat. Builds confidence on the ball when defenders are close.

Right-foot passing wall · 15 min

10 passes against a wall with the right foot, then 10 with the left. Repeat 10 rounds. Simple and boring but it works.

Shuttle runs · 20 min

5 sets of 6 sprints between cones 10 meters apart, 30 second rest. Builds the late-game fitness that's missing right now.

Pass and move squares · 20 min

4 players in a 10x10 square. Pass, then move to a different corner. Builds scanning and movement together.

Shooting from the edge of the box · 20 min

Receive a pass, take one touch to set yourself, shoot with the left then the right foot. 10 reps each side.

Weekly Focus

Mix one fitness session, one passing session, and one finishing session each week. Keep games in the rotation too — match minutes are still the best teacher.

30-Day Development Plan

First 30 days are about building habits. Daily right-foot work for 10 minutes — even at home with a ball against a wall. Two fitness sessions a week minimum. Track how you feel in the last 15 minutes of every match.

90-Day Development Plan

By 90 days, the right foot should be reliable for short passes and the legs should hold up for full matches. Add small-sided games with older players if possible — that's where the biggest jumps happen.

VIDEO COMMENTS

00:24 · Great first touch on a tough ball — already checking his shoulder before it arrives.

01:12 · Beats his man cleanly — fakes inside, goes outside, plays a perfect cut-back.

02:40 · Should look around earlier here — gets caught with the ball and loses it.

03:55 · Smart run in behind the defence — perfect timing between the two defenders.

05:18 · Brilliant left-footed switch of play. Changes the whole shape of the attack.

07:02 · Drops deep to help build-up — shows maturity in his game.

FINAL SUMMARY

Lukas is one of the more impressive players we've reviewed in his age group. The technique and game intelligence are already at a high level — what he sees and chooses to do with the ball is mature. Fitness is the next big step, alongside daily right-foot work. Keep doing what he's doing, add those two areas, and the path forward is wide open.
