Grant E2E, a 12-year-old winger, demonstrates early promise with exceptional dribbling (9/10) and ball control (9/10). His current development phase is reminiscent of Khvicha Kvaratskhelia, who also joined Dinamo Tbilisi's academy at age 12. By data similarity, the closest senior pro to Grant is D. Berardi. Nurturing these talents will be crucial for Grant E2E's continued progress.

TECHNICAL ANALYSIS

Ball, dribbling, passing, shooting

First Touch

8 / 10

His first touch is consistently positive, setting him up to attack space immediately. He takes the ball in stride and is instantly ready for his next action, putting defenders on the back foot from the moment he receives it. The chest control to bring down a high ball demonstrates good technique and composure.

WHY THIS SCORE

The score reflects his ability to kill the ball and immediately transition into an attack, a vital skill for a winger. While excellent, we did not see him receive a pass with his back to goal under heavy pressure, which would be needed for a 9-10 score.

Ball Control

9 / 10

He maintains exceptional control of the ball while dribbling at high speed. The ball is kept very close to his feet, allowing for rapid changes of direction to unbalance defenders. Even in crowded areas of the penalty box, he manipulates the ball with precision to create space for a shot.

WHY THIS SCORE

A score of 9 is given for his mastery of the ball at speed. He rarely, if ever, loses possession due to a poor touch while running. This level of control is what makes his dribbling so effective and is advanced for his age.

Dribbling

9 / 10

A dynamic and confident dribbler who attacks his opponent with purpose. He uses a combination of raw pace and quick changes of direction to get past players. He is not just dribbling for the sake of it; every run is designed to break lines and create a scoring chance.

WHY THIS SCORE

He gets a 9 because his dribbling is not just successful, it's decisive. He consistently turns a dribble into a goal or a clear shot. His end product after beating a man is what separates him from others at this age.

Passing

▲ NEED MORE FOOTAGE

The footage exclusively shows the player dribbling and shooting; his passing range and vision were not demonstrated.

Shooting

9 / 10

He is a clinical and versatile finisher. He scored three goals in this short clip, showcasing different types of finishes: a determined scramble, a composed, placed shot with his weaker foot, and a powerful strike from distance. He strikes the ball with confidence and purpose, always aiming for the corners.

WHY THIS SCORE

This is a 9 because of the variety and efficiency of his finishing. Scoring with both feet and from different situations demonstrates a level of goal-scoring instinct that is rare. The power generated at 0:39 is particularly impressive.

Weak Foot

8 / 10

His left foot is a genuine weapon, not just for balance. He scored an excellent goal with it, cutting inside and placing the ball accurately into the far corner. This ability to go either way and finish effectively makes him incredibly difficult to defend against.

WHY THIS SCORE

Scoring such a clean goal under pressure warrants a high score. To reach a 9 or 10 would require seeing him use his weak foot for passing, crossing, and taking powerful shots, but for finishing, it is already at a very high level.

9 / 10

He is dominant in one-on-one attacking situations. He actively seeks out defenders to take on and uses his speed, agility, and close control to unbalance and beat them consistently. His mindset is to get past his man and shoot, which he does with remarkable success.

WHY THIS SCORE

He receives a 9 for his complete superiority in these duels. He doesn't just beat players; he creates a clear scoring chance immediately after. He has the confidence and the technical tools to win these individual battles every time.

TACTICAL ANALYSIS

Scanning, decisions, positioning

Positioning

8 / 10

He shows a good understanding of where to be to cause maximum damage. He starts in wide areas to isolate full-backs but is intelligent in his movement to drift inside and find pockets of space on the edge of the box. He is always in a position to receive the ball in a forward-facing, dangerous area.

WHY THIS SCORE

The score reflects his excellent attacking positioning. He instinctively knows where the space is and how to exploit it. To score higher, we would need to see his positioning without the ball over a longer period, including defensive phases.

Off Ball Movement

8 / 10

His movement without the ball is purposeful and designed to get him into goal-scoring positions. He makes sharp, angled runs to get in behind the defensive line. He varies his movement, sometimes coming short and at other times running beyond.

WHY THIS SCORE

He scores an 8 because his movement directly leads to high-quality chances. It's intelligent and well-timed. A higher score would require seeing more variation, like decoy runs to create space for others.

Scanning

Decision Making

8 / 10

In the final third, his decision-making is excellent. He correctly identifies when to take a player on and when to shoot. He doesn't hesitate, which is a sign of a confident and decisive player. The choice of finish for each goal was the correct one for the situation.

WHY THIS SCORE

The score of 8 is for his consistently high-quality decisions in goal-scoring situations. The key missing element for a higher score is seeing his decisions in possession further from goal, such as when to pass, switch play, or retain possession.

Timing Of Runs

8 / 10

His runs from wide positions into the channels are timed very well. He breaks the defensive line just as the pass is played, showing a good connection with his teammates. He have a natural instinct for when to accelerate into space.

WHY THIS SCORE

An 8 is awarded for the effectiveness of his runs, which consistently put him in on goal. It's a key part of his threat. To confirm a higher score, footage from a wider angle showing his movements relative to the entire defensive line is needed.

PHYSICAL ANALYSIS

Speed, balance, agility, stamina

Acceleration

8 / 10

He possesses a decisive burst of pace over the first 5-10 yards. This acceleration allows him to separate from defenders quickly, both with and without the ball. It is his primary tool for getting past opponents in 1v1 situations.

WHY THIS SCORE

He gets an 8 because his acceleration is a game-changing attribute that directly leads to his success. It's a clear weapon. A higher score would be reserved for truly elite, explosive speed that is unmatched on the field.

Speed

8 / 10

He has good top-end speed and, crucially, can maintain it while dribbling. Once he gets into his stride, defenders struggle to catch him. This allows him to carry the ball over longer distances and sustain attacking runs.

WHY THIS SCORE

The score reflects his effective game speed, which is more than enough to trouble defenders at this level. We haven't seen his absolute maximum speed against an equally fast opponent, which is necessary for a top-tier score.

› Currently sitting at pro_academy for a 12-year-old Winger. To improve, focus on running mechanics and maintaining speed over the final 10-20 meters of a sprint.

Balance

9 / 10

His balance is a cornerstone of his dribbling ability. He remains upright and in control when changing direction at speed and can ride challenges from defenders without being knocked off the ball. This low center of gravity makes him very difficult to dispossess.

WHY THIS SCORE

A 9 is warranted because his balance is exceptional and integral to his entire playing style. He uses it as a tool to beat players and protect the ball. It's a standout physical attribute.

Agility

8 / 10

He is very agile, with quick feet and the ability to stop, start, and change direction seamlessly. This allows him to be elusive in tight spaces and execute sharp cuts to create separation from his markers. His agility is the perfect complement to his acceleration.

WHY THIS SCORE

He scores an 8 as his agility is a key weapon in his 1v1 dominance. He consistently uses it to create space for himself. It is a well-developed attribute that is fundamental to his success.

He has fantastic control over his body movements. He effectively uses feints and body swerves to send defenders the wrong way. His ability to decelerate and accelerate in an instant, all while keeping the ball and his body in perfect sync, is at a very high level.

WHY THIS SCORE

He gets a 9 because his body control is what elevates his dribbling from just being fast to being truly skillful. He manipulates defenders with his body, not just the ball. This is a subtle but elite skill.

Confidence

9 / 10

He plays with supreme confidence in his own ability. He is never afraid to take on a defender, and he shoots with conviction from any angle. His positive body language and celebrations after scoring show a player who believes he can make a difference every time he gets the ball.

WHY THIS SCORE

A 9 is given for his unwavering belief in his attacking abilities. He is the protagonist in every clip, demanding the ball and taking responsibility. This mentality is a huge asset for an attacking player.

Trial readiness is computed from the scores in this report. It is a scout-style guide, not a guarantee of selection.

Scout view — how a scout might assess this player

KEY STRENGTHS

- Clinical finishing with both feet, showing great composure in front of goal.
- Exceptional one-on-one dribbling ability, using pace and agility to beat defenders.
- High level of confidence and a competitive drive to be the match-winner.
- Excellent balance and body control, allowing him to stay on his feet and manipulate the ball in tight spaces.

AREAS OF CONCERN

- Passing and creative ability for teammates is completely unknown from this footage.
- Defensive contribution, work rate, and tactical discipline were not observable.
- Over-reliance on individual dribbling could be an issue if he doesn't develop his combination play.

DEVELOPMENT PRIORITIES

- Develop passing range and decision-making to know when to release the ball to a teammate.
- Learn and apply defensive responsibilities for a winger, including tracking back and pressing.
- Practice scanning the field before receiving the ball to improve overall awareness.
- Work on combination play, such as one-twos, to add variety to his attacking threat.

Next competitive level	Trial with an elite or professional academy.
Positional suitability	Best suited as a winger or wide forward in an attacking system where he is given the freedom to take players on and get shots away. His goal-scoring instincts also make him a candidate for a second striker role.

This is an independent development analysis and does not guarantee selection or advancement opportunities.

Potential assessment

Current level	Performs at an elite level for his age group in key attacking attributes.
Development potential	He has very high potential. Players with his combination of speed, skill, and goal-scoring instincts are rare. If he develops the tactical and creative parts of his game, his ceiling is enormous.
Recommended next step	Seek out the highest level of coaching and competition available. A professional academy environment would challenge him to develop the parts of his game that are currently untested.
3-month focus	Become more than just a goal-scorer. Focus on drills that reward making the right pass. Aim to get one assist for every two goals in training games.

Personal training plan

FIVE FOCUSED EXERCISES

- 01

1v1 to 2v1 Transition · 15 min
Start 1v1 against a defender. After beating the defender, a second attacker joins to make it a 2v1 against the same defender, forcing a pass-or-shoot decision.
- 02

Scanning & Receiving Gates · 10 min
Set up colored cone 'gates'. Coach calls a color just before the pass is made; player must scan, receive on the half-turn, and dribble through the correct gate.
- 03

Finishing Under Pressure · 15 min
Receive the ball with a defender closing down from behind. Must take one touch to create space and a second to shoot. Use both feet.
- 04

Wide Combination Play · 15 min
Work with a midfielder or fullback on the wing. Practice one-twos, overlaps, and give-and-go movements to get in behind a cone-based defense.
- 05

Defensive Transition Sprints · 10 min
After completing an attacking drill (e.g., a shot), immediately perform a 20-yard recovery sprint back to a designated cone to build defensive habits.

Weekly focus

This week's focus is on end-product variety. In every training session, set a personal goal to create as many chances for teammates as you do for yourself. After every 1v1 drill, find a pass to a teammate in a shooting position.

30-day plan

Over the next month, the primary goal is to improve decision-making in the final third. Chart your actions in small-sided games: dribbles, shots, and key passes. Review the numbers with a coach to identify moments where a pass would have been a better option than a dribble or shot.

90-day plan

By the end of three months, the aim is to be a dual-threat attacker. You will have integrated scanning into your game before receiving the ball, and your defensive work rate will have noticeably improved. Success will be measured not just by your goals, but by your assists and your team's defensive solidity on your side of the pitch.

Video moments — frame-stamped evidence

frame unavailable	00:37 Fantastic piece of individual skill. The sharp cut inside combined with a powerful strike demonstrates his elite 1v1 and shooting ability.
frame unavailable	00:39 What a strike. Power, accuracy, and confidence. The loud event at 39.00s confirms the quality of this goal.

Final summary

Grant is a player of immense attacking talent, defined by his direct dribbling and lethal finishing. He possesses the physical tools and mental confidence to dominate games at his current age group. His performance in this clip is that of an elite-level youth player. The key to unlocking his vast potential will be broadening his game beyond individual brilliance, focusing on tactical awareness, passing, and defensive contribution to become a complete and even more dangerous footballer.

How ScoutMePlay scores — methodology

Every report is built around the same four player-development pillars used across European Category-1 youth academies. This appendix explains how we evaluate, benchmark, and tier players — so any coach or scout receiving this PDF can understand the numbers.

ALIGNED WITH UEFA YOUTH-DEVELOPMENT PILLARS · NOT CERTIFIED OR ENDORSED BY UEFA

THE FOUR PILLARS

TECHNICAL	Skills with the ball — first touch, ball control, passing, dribbling, shooting, weak-foot use, 1v1.
TACTICAL	Decisions without the ball — positioning, off-ball movement, scanning, decision-making, timing of runs, game understanding.
PHYSICAL	Athletic foundation — acceleration, speed, balance, agility, intensity (90-minute), body control.
MENTAL	Habits and character — confidence, work rate, courage in duels, response to mistakes, competitive mindset, focus.

THE FOUR-TIER LADDER

Each sub-skill is scored 1-10 and placed into one of four tiers, calibrated to the player's age and position.

ELITE ACADEMY	Top-end Category-1 academies (La Masia, Clairefontaine, Cobham-level). Top 1-3% of an age group.
PRO ACADEMY	Strong regional or national pro-club academies. Trial-ready for serious competitive pathways. Top 10-15%.
STRONG CLUB	Higher-level competitive club football, talent centres, district selections. Top 30%.
STANDARD CLUB	Mainstream club football where most players develop. Baseline for organised youth football.

AGE BRACKETS

A 7/10 for first touch at U11 is not the same as a 7/10 at U17. Every score is calibrated against the typical milestone for the age bracket and position.

U11	Foundation — coordination, ball mastery, basic decision-making.
U13	Build phase — scanning habits, positional discipline, both-footed development.

U15	Performance phase — match impact, pressing intensity, tactical role clarity.
U17	Specialisation — position-specific excellence, physical maturity, mental resilience.
U19	Pre-professional — match management, leadership, consistency across 90 minutes.
U21	Professional threshold — high-performance habits, durability, decision quality at speed.

WHAT WE DON'T CLAIM

- We are not UEFA-certified. We align with the same pillars used in UEFA elite-youth coaching education — that's it.
- We don't publish childhood scores of professional players. Stylistic archetype comparisons describe style, not factual youth data.
- We don't guarantee selection, signing, or progression to any club or academy.
- Set-pieces from open play, off-camera defensive work, and goalkeeping moments are not assessable from outfield clips.
